low fee private schooling represents a point of heated debate in the international policy context of education for all and the millennium development goals while on the one hand there is an increased push for free and universal access with assumed state responsibility reports on the mushrooming of private schools targeting socially and economically disadvantaged groups in a range of developing countries particularly across africa and asia have emerged over the last decade low fee private schooling has thus become a provocative and illuminating area of research and policy interest on the impacts of privatisation and its different forms in developing countries this edited volume aims to add to the growing literature on low fee private schooling by presenting seven studies in five countries ghana india kenya nigeria and pakistan and is bookended by chapters analysing some of the evidence and debates on the topic thus far the book presents research findings from studies across three levels of analysis that have proven relevant in the study of low fee private schooling the household school and state chapters address household schooling choice behaviours regarding low fee private and competing sectors the management operation and relative quality of low fee private schools and changes to the regulatory frameworks governing low fee private schools and the impact of low fee private schools on those frameworks the book does not seek to

provide definitive answers since as an emerging and evolving area of study this would be premature instead it aims to call attention to the need for further systematic research on low fee private schooling and to open up the debate by presenting studies that use a range of methods and owing to the context specificity of the issue draw different conclusions the hope is that these studies may serve as springboards to further research finally the book does not aim to snuff out the political and vociferous debate surrounding low fee private schooling and private provision more broadly or to erase the complications that abound in conducting research in this area but to engage with them the hope is that as the 2015 target date for education for all and millennium development goals approaches this book may help us get closer to answering the question do low fee private schools aggravate equity or mitigate disadvantage
